I. DetailsExplanation to City Plan, Wonsan-si

- 1) Bridge: An entirely wooden structure built in late 1952 to replace the old, war-damaged one; about 120 meters long, six meters wide, and five meters high above the water. It was observed to be used permanently.
- 2) 1A Sub-Station (Designation Unknown): A wooden, single story structure, with cement coated walls and a cement tile roof; five meters long, five meters wide, and three meters high. This sub-station remained undamaged through the war.
- 3) Barbed Wire Fence: This fence, about two meters high [redacted] and was apparently set up to keep the public out of a mined area surrounding the Songdo Recreation Center. 25X1
- 4) Military Sentry Post (Unidentified Unit), 2nd Corps, NKPA: A wooden, single story structure, with mud walls and a tile roof; three meters long, three meters wide, and three meters high.
- 5) Residences (Unidentified Organization): Approximately 28 wooden, single story structures built in late 1953, with mud walls and thatched roofs, each measuring about nine meters long, six meters wide, and four meters high and housing two families.
- 6) Residences, Kangwon-do Committee, Korea-Soviet Cultural Association: Approximately nine wooden, single story structures built in mid-1954, with mud walls and thatched roofs, each measuring about ten meters long, six meters wide, and four meters high and housing two families.
- 7) Former Site for Wonsan Girls' Senior Middle School: This was the former site for the Wonsan Girls' Senior Middle School which was damaged during the war and was not reconstructed [redacted] However, the school was to be reconstructed in the future. 25X1
- 8) Annexed Building, Medical Station, 2nd Corps, NKPA: A wooden, single story structure built after the Armistice in Jul 1953 by the Medical Station. It has mud walls and a thatched roof and is 15 meters long, eight meters wide, and four meters high.
- 9) Annexed Building, Medical Station, 2nd Corps, NKPA: A wooden, single story structure built after the Armistice. It has mud walls and a thatched roof and is about six meters long, four meters wide, and four meters high.
- 10) Annexed Building, Medical Station, 2nd Corps, NKPA: A wooden, single story structure, built after the Armistice, with mud walls and a thatched roof; six meters long, four meters wide, and four meters high.
- 11) Main Building, Medical Station, 2nd Corps, NKPA: A Japanese-day red brick

structure of two stories, war-damages repaired after the war, with a flat, reinforced concrete roof; about 100 meters long, ten meters wide, and ten meters wide, and ten meters high.

- 12) Residences, Wonsan 1st Fishing Station: A wooden, single story structure built after the war, with mud walls and a cement tile roof; about five meters long, five meters wide, and three meters high.
- 13) Residences, Kangwŏn-do Committee, Korea-Soviet Cultural Association: Six wooden, single story structures built after the war, with mud walls and thatched roofs, each measuring about nine meters long, six meters wide, and four meters high housing two families.
- 14) Wonsan Fishing Station: A Japanese-day wooden structure of single story, repaired of war-damages by its employees, with gray cement coated walls and a tile roof; about 50 meters long, seven meters wide, and five meters high.
- 15) Repair Shop, Wonsan Fishing Station: A Japanese-day single story structure repaired of war-damages by its employees, with cement coated walls and a cement tile roof; about 30 meters long, seven meters wide, and four meters high.
- 16) Residences, Probably Wonsan Coastal Defense Unit, MOIA: 12 wooden, single story structures built in May 1954, with mud walls and thatched roofs, each measuring about six meters long, five meters wide, and three meters high and housing one family. Of the 12 houses, three belonged to the Wonsan Fishing Station.
- 17) Residences, Kangwŏn-do Committee, Korea-Soviet Cultural Association: Ten wooden, single story structures built in Oct 1953, with mud walls and thatched roofs, each measuring about six meters long five meters wide, and three meters high and housing one family. Two of them were roofed with gray tin.
- 18) Barrack, Probably Wonsan Coastal Defense Unit, MOIA: A Japanese-day wooden, single story structure reconstructed from serious war-damages by the employees after the war, with mud walls and a cement tile roof; about 30 meters long, seven meters wide, and five meters high.
- 19) Barrack, Probably Wonsan Coastal Defense Unit, MOIA: A wooden, single story structure built by its members in May 1954, with mud walls and a thatched roof; about 25 meters long, seven meters wide, and five meters high.
- 20) Kangwŏn-do Committee, Korea-Soviet Cultural Association: A Japanese-day brick, two story structure left undamaged during the war, with white tile walls and a flat, reinforced concrete roof; 25 meters long, eight meters wide, and ten meters high.
- 21) Hotel, Kangwŏn-do Committee, KIP: A Japanese-day brick, single story structure of "L" shape, reconstructed from war-damages by the Kangwŏn-do Construction Trust (KCT) in Jun 1955, with red brick walls and a cement tile roof; about 50 meters long, nine meters wide, and six meters high.

CONFIDENTIAL

CONFIDENTIAL.

- 22) Annexed Building, Kangwŏn-do Committee, Korean Consumers' Guild: A Japanese-day brick, single story structure of "L" shape, repaired of war-damages by its employees after the war, with red brick walls and a part tile and part tin roof; about 60 meters long, eight meters wide, and six meters high.
- 23) Democratic Propaganda Office, Ch'ungseong-dong Office: A wooden, single story structure built in May 1954, with mud walls and a cement tile roof; about 25 meters long, eight meters wide, and four meters high.
- 24) Ch'ungseong-dong Office: A wooden, single story structure built after the war, with mud walls and a cement tile roof; about seven meters long, six meters wide, and four meters high.
- 25) Residences, Kangwŏn-do Committee, KLP: Approximately 20 wooden, single story structures built by the KCT after the war, with white lime coated walls and cement tile roofs, each measuring about eight meters long, eight meters wide, and four meters high and housing one family.
- 26) Kangwŏn-do Committee, KLP: A brick, three story structure of "T" shape, built in early 1948 and reconstructed from war-damages by the KCT shortly after the war, with yellow cement coated walls and a flat concrete roof; about 120 meters long, 10 meters wide, and ten meters high.
- 27) Residences, Kangwŏn-do Committee, KLP: Approximately ten wooden, single story structures built by the KCT after the war, with white lime coated walls and cement tile roofs, each measuring about eight meters long, six meters wide, and four meters high and housing one family.
- 28) Warehouse, Kangwŏn-do Forestry Station: A wooden, single story structure built by the employees shortly after the war, with mud walls and a thatched roof; about 25 meters long, seven meters wide, and six meters high.
- 29) Main Building, Kangwŏn-do Forestry Station: A wooden, single story structure built by the employees shortly after the war, with white lime coated walls and a cement tile roof; about 50 meters long, eight meters wide, and five meters high.
- 30) Residences, Kangwŏn-do Forestry Station: Approximately 42 wooden, single story structures built after the war, with mud walls and thatched roofs, each measuring about five meters long, five meters wide, and three meters high. Of them, five were owned by some employees of the Kangwŏn-do Committee of the Korea-Soviet Cultural Association and about ten by civilians.
- 31) Kangwŏn-do KLP Staff School: A brick, two story structure reconstructed from its serious war-damages by the KCT shortly after the war, with red-brick walls and a cement tile roof; about 50 meters long, ten meters wide, and ten meters high.
- 32) Wŏnsan-si IA Station: A Japanese-day two story structure of granite, reconstructed from war-damages by its employees shortly after the war, with yellow stone walls and a flat, reinforced concrete roof; about 50 meters long, ten meters wide, and eight meters high.
